H.E.R.B.I.E. V1 Engineering Summary (Regenerated)

Version 1: stationary skeleton-first concept; 18 prototype components.
Original historical PDF not included: this is a regenerated summary.
Dimensions are preliminary; nominal machine screw M3 holes need testing.
R01-R16 references and terminology are in this repository.
Recommended checks: 1. hole fit, 2. mating alignment, 3. shell segmentation,
4. static stability, 5. head load, 6. power and compute clearances.
